PROFILE SUMMARY

Motivated B.Tech Computer Science (AIML) student with strong foundations in programming, databases, and problem solving. Skilled in Python, SQL, and Machine Learning, with hands-on experience in NLP projects and Salesforce CRM automation. Passionate about building real-world applications and applying data-driven solutions to practical problems.

EXPERIENCE

Software Intern — Salesforce Virtual / Remote

May 2025 – Jul 2025

SmartBridge (SRM University AP Collaboration)

- Assisted in designing and automating CRM workflows to improve operational efficiency.
- Customized Salesforce objects, page layouts, and automation features for business use cases.
- Supported data handling and integration tasks to enhance system performance and reliability.
- Gained hands-on experience with real-time project development and team collaboration.

PROJECTS

Smartwatch Sentiment Analyzer

Python, NLP, BERT, Flask

- Developed a sentiment analysis system to classify smartwatch reviews as positive, negative, or neutral.
- Implemented machine learning and Transformer-based models (BERT) for accurate text classification.
- Built a Flask web application to enable real-time sentiment prediction for user-submitted reviews.
- Applied text preprocessing techniques including tokenization, stop-word removal, and embeddings.

Loan Prediction System

Python, Machine Learning

- Developed a supervised machine learning model to predict loan approval decisions using historical applicant data.
- Performed data cleaning, feature selection, and model training to improve predictive performance.
- Evaluated model effectiveness using accuracy, precision, recall, and F1-score metrics.

Plagiarism Checker & Document Analyzer

Python, NLP

- Designed a document analysis tool to detect plagiarism using text preprocessing and similarity measurement techniques.
- Implemented tokenization, normalization, and vectorization to compare documents efficiently.
- Generated similarity scores to identify duplicate or overlapping content across multiple documents.

Restaurant Management System

SQL, DBMS

- Designed and implemented a relational database system to manage menu items, orders, customer details, and billing operations.
- Created normalized schemas and ER diagrams to ensure data integrity and scalability.
- Optimized SQL queries to improve data retrieval speed and reporting efficiency.

Salesforce CRM Automation

Salesforce, Flows

- Implemented CRM workflow automations to reduce manual effort and enhance operational efficiency.
- Customized Salesforce objects, page layouts, and flows to support end-to-end customer lifecycle management.
- Improved data accuracy and process consistency through automated validation and process flows.

EDUCATION

SRM University AP, Amaravati

2023 – 2027

B.Tech in Computer Science & Engineering (AIML) – CGPA: 7.90

SKILLS

Technical Skills

Languages: Python, C++, Java, C, SQL

Web: HTML, CSS, JavaScript

Databases: MySQL

Tools: Git, VS Code, Salesforce

Concepts: DSA, OOPS, ML, DBMS, OS, CN, Generative AI

Soft Skills

Teamwork

Communication

Problem Solving

CERTIFICATIONS

Oracle Certified Professional: Java SE 17 Developer - 2026
