EXPERIENCE

Salesforce Virtual Intern

SmartBridge

Remote, India

May 2025 – Jul 2025

- Designed and configured custom objects, automation flows, validation rules, and dashboards to enhance workflow efficiency and data visibility within Salesforce.
- Implemented Salesforce security model, including profiles, permission sets, and role hierarchy across user access and data integrity across the system.
- Developed mini end-to-end CRM application using Lightning App Builder and automation tools to simulate real business processes.

PROJECTS

Smartwatch Sentiment Analyzer | Python, NLP, BERT/RoBERTa, Flask

- Developed a sentiment analysis tool using ML and Transformer models (BERT/RoBERTa) with a Flask web app for real-time review classification.
- Improved prediction reliability by experimenting with multiple pre-trained models and fine-tuning hyperparameters.

Stress Detection Using ML | Python, TF-IDF, SVM, GridSearchCV

- Implemented an end-to-end NLP pipeline for stress classification using TF-IDF features and a Linear SVM model.
- Preprocessed text data (lowercasing, URL and punctuation removal, token cleanup) to improve model performance.
- Optimized the model using GridSearchCV and evaluated it using precision, recall, and F1-score metrics.

Plagiarism Checker & Document Analyzer | Python

- Designed a Python-based tool to detect plagiarism by comparing content similarity across multiple documents.
- Added document analytics features including word count, keyword density, and structural content analysis.

Interior Design Website | HTML, CSS, PHP, SQL

- Developed a responsive website featuring a design gallery, contact forms, and client feedback modules.
- Implemented backend functionality using PHP and SQL for data handling and user interaction management.

Men's Fashion E-Commerce Platform | Salesforce, Flows, Apex, Visualforce, LWC

- Built a Salesforce-based platform to manage customer profiles, orders, inventory, and personalized recommendations.
- Enhanced user experience by automating business processes using Salesforce Flows and Lightning Web Components.

Handsmen Thread | Salesforce, Flows, Apex, Visualforce, LWC

- Developed a Salesforce-based CRM platform to manage customer requests, service assignments, and workflow tracking.
- Automated end-to-end operations using Salesforce Flows, Apex, Visualforce, and LWC to improve efficiency.

EDUCATION

SRM University, Amaravati

Bachelor of Technology in Computer Science and Engineering – GPA: 8.21/10

Andhra Pradesh, India

2023- 2027

TECHNICAL SKILLS

Languages: C, C++, Python

Web Technologies: HTML, CSS, JavaScript, PHP

Databases: SQL

Concepts: Data Structures & Algorithms, OOPS, Machine Learning, Operating Systems, Computer Networks, Generative AI

Platforms: Salesforce (Lightning App Builder, Flows, Apex, LWC, Visualforce)

CERTIFICATIONS

Oracle Certified Professional: Java SE 17 Developer - 2026

View Credential

Deloitte Cyber Security Virtual Internship

View Credential

Deloitte Data Analytics Virtual Internship

ACTIVITIES & LEADERSHIP

Smart India Hackathon (SIH) | Participant

- Gained hands-on experience in collaborative problem-solving, innovation, and rapid development under real-time pressure.
