PROFILE SUMMARY

Computer Science student specializing in Artificial Intelligence and Machine Learning, with a strong foundation in Java, Python, and SQL. Experienced in developing AI-based and web applications, and eager to apply skills in real-world software development.

EXPERIENCE

Salesforce Virtual Intern

SmartBridge

Remote, India

May 2025 – Jul 2025

- Designed and configured custom objects, automation flows, validation rules, and dashboards to enhance workflow efficiency and data visibility within Salesforce.
- Implemented Salesforce security model, including profiles, permission sets, and role hierarchy across user access and data integrity across the system.
- Developed mini end-to-end CRM application using Lightning App Builder and automation tools to simulate real business processes.

PROJECTS

Automated Resume Screening System | Python, NLP, GenAI, Flask

- Built a Generative AI-powered system to analyze and screen unstructured resume text using NLP-based semantic feature extraction.
- Integrated the model into a Flask web application and evaluated performance using accuracy, precision, recall, and F1-score.

Freelancer Marketplace Platform | ReactJS, Node.js, Express.js, MongoDB, 2026

- Developed a full-stack web application connecting clients and freelancers with project posting, bidding, and collaboration features.
- Built RESTful APIs using Node.js and Express.js to manage users, projects, and proposals efficiently.
- Implemented role-based authentication and secure login functionality for clients and freelancers.
- Designed a responsive and dynamic user interface using ReactJS for seamless user experience.
- Integrated MongoDB database for storing and managing user data, project details, and applications.

Interior Design Website | HTML, CSS, PHP, SQL

- Developed a responsive website featuring a design gallery, contact forms, and client feedback modules.
- Implemented backend functionality using PHP and SQL for data handling and user interaction management.

Restaurant Management System | DBMS, SQL, ER Modeling

- Developed a DBMS-based system to automate reservations, order processing, and payment management.
- Designed ER diagrams, normalized the database to Third Normal Form (3NF), and implemented optimized SQL queries.

Handsmen Thread | Salesforce, Flows, Apex, Visualforce, LWC

- Developed and customized CRM solutions using Salesforce tools including Apex, Lightning WebComponents(LWC),and Flows.
- Automated business processes such as lead management and data workflows, improving efficiency and reducing manual effort.

EDUCATION

SRM University, Amaravati

Bachelor of Technology in Computer Science and Engineering – GPA: 8.27/10

Andhra Pradesh, India

2023- 2027

SKILLS

Technical Skills

Languages: C++, Python, Java

Web: HTML, CSS, JavaScript, PHP

Databases: SQL,DBMS

Technologies: SQL, VS Code, GitHub

Concepts: Data Structures & Algorithms, AIML

Soft Skills

Communication

Teamwork

Problem Solving

Adaptability

Time Management

CERTIFICATIONS

Oracle Certified Professional: Java SE 17 Developer - 2026
